About the Renewable Energy Technology Action (RETAP):

- The **RETAP** aims to accelerate the deployment and scaling of new and emerging renewable energy technologies, with an initial focus on **green/clean hydrogen, wind energy, long duration energy storage**, and exploring **geothermal energy, ocean/tidal energy**, and other emerging technologies as mutually determined in the future.
- It was announced in **2023** and is guided by **5 themes: Research & Development, Piloting & Testing of Innovative Technologies, Advanced Training & Skill Development, Policy & Planning** for Advancing RET and enabling technologies, and **Investment, Incubation and Outreach** programmes.
